Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to method of shipping, classified in class 705 subclass 29
- II. Claims 10-28, drawn to method of data identification, classified in class 369 subclass 24.01
- III. Claim 29, drawn to storage medium, classified in class 360 subclass 131
- IV. Claim 30, drawn to a storage medium with plural addresses, classified in class 365 subclass 230.03
- VII. Claim 31, drawn to a computer system, classified in class 709 subclass 223.
- VIII. Claim 32, drawn to a server, classified in class 709, subclass 400.

The inventions are distinct, each from the other because:

Inventions I-VIII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each has separate utility such as in a word processing application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
